

Ω-RHZ / Rhizome

Infrastructure/fleet SoC

IP-4935 · Integrated reference · SoC architecture + source

Function and architecture

- TSN/SerDes
- service/host control
- resource scheduling
- fault isolation
- fleet desired-state cache

Integration summary

Integration scope, interfaces and qualification are agreed for the selected release.

Technical record

Canonical identity	IP-4935
Responsibility	Infrastructure/fleet SoC
Delivery boundary	SoC architecture + source
Evidence scope	Integrated reference

Delivery and release binding

- Constituent release manifest
- Topology and physical integration assumptions
- System software and orchestration boundaries
- Qualification scope and system-level acceptance

Confirm for the selected release: Environment and dependencies, Version / build hash, API compatibility, License and support scope.

Evidence and qualification

The V29 estate records a structurally closed 17-SoC hierarchy and native software/reference-model evidence.

V29 inherited structural RTL and model evidence do not constitute a fresh foundry physical-signoff or fabricated-product result.

Source basis: Bible v7.42 §142, IP-4935

Evaluation and licensing

Evaluation: System architecture evaluation. Production: Platform integration program. Custom work: Customer-specific system composition. Rights, pricing, support and acceptance criteria are agreed for the exact scope.
